

BUILDING Number Systems

FINAL TEST

ALL RIGHTS RESERVED © 2001

Add these roman numerals without converting them to Arabic numerals.

$$\begin{array}{r} 1) \quad \text{MMDCLXXXIV} \\ + \quad \text{CCLXXVI} \end{array}$$

$$\begin{array}{r} 2) \quad \text{CMLXI} \\ + \quad \text{CDXXXVII} \end{array}$$

Add these base two numbers and give the answers in base two.

$$\begin{array}{r} 3) \quad 100110_{\text{two}} \\ + \quad 110011_{\text{two}} \end{array}$$

$$\begin{array}{r} 4) \quad 10110001_{\text{two}} \\ + \quad 11000101_{\text{two}} \end{array}$$

$$\begin{array}{r} 5) \quad 1000111_{\text{two}} \\ + \quad 11101_{\text{two}} \end{array}$$

Subtract the following in base two.

$$\begin{array}{r} 6) \quad 1100101_{\text{two}} \\ - \quad 1001100_{\text{two}} \end{array}$$

$$\begin{array}{r} 7) \quad 1011101_{\text{two}} \\ - \quad 1001010_{\text{two}} \end{array}$$

$$\begin{array}{r} 8) \quad 1110101_{\text{two}} \\ - \quad 111001_{\text{two}} \end{array}$$

Multiply the following base two numbers.

$$\begin{array}{r} 9) \quad 110111 \\ \times \quad 101_{\text{two}} \end{array}$$

$$\begin{array}{r} 10) \quad 101110 \\ \times \quad 1101_{\text{two}} \end{array}$$

$$\begin{array}{r} 11) \quad 1011010 \\ \times \quad 111_{\text{two}} \end{array}$$

Divide the following base two numbers.

$$12) \quad 100000 \overline{) 100100000}_{\text{two}}$$

$$13) \quad 1010 \overline{) 101101000}_{\text{two}}$$

Fill in the blanks to make the equations true.

14) $64_{\text{ten}} = \underline{\hspace{2cm}}_{\text{eight}}$

15) $123_{\text{eight}} = \underline{\hspace{2cm}}_{\text{ten}}$

Add the following base eight numbers.

$$\begin{array}{r} 16) \quad 5471 \\ + \quad 4432_{\text{Eight}} \\ \hline \end{array}$$

$$\begin{array}{r} 17) \quad 2623 \\ + \quad 5255_{\text{Eight}} \\ \hline \end{array}$$

$$\begin{array}{r} 18) \quad 4716 \\ + \quad 5433_{\text{Eight}} \\ \hline \end{array}$$

Subtract the following in base eight.

$$\begin{array}{r} 19) \quad 3275 \\ - \quad 2626_{\text{Eight}} \\ \hline \end{array}$$

$$\begin{array}{r} 20) \quad 5471 \\ - \quad 4432_{\text{Eight}} \\ \hline \end{array}$$

$$\begin{array}{r} 21) \quad 5433 \\ - \quad 4716_{\text{Eight}} \\ \hline \end{array}$$

Change problems 19 --21 to base ten and subtract

19)

20)

21)

Multiply the following in base eight.

$$\begin{array}{r} 22) \quad 2375 \\ \times \quad 76_{\text{Eight}} \\ \hline \end{array}$$

$$\begin{array}{r} 23) \quad 1463 \\ \times \quad 136_{\text{Eight}} \\ \hline \end{array}$$

$$\begin{array}{r} 24) \quad 6543 \\ \times \quad 47_{\text{Eight}} \\ \hline \end{array}$$

25) $64_{\text{ten}} = \underline{\hspace{2cm}}_{\text{sixteen}}$

26) $1f_{\text{sixteen}} = \underline{\hspace{2cm}}_{\text{ten}}$

Add the following in base sixteen.

$$\begin{array}{r} 27) \quad 54c7_{\text{sixteen}} \\ + \quad 3956_{\text{sixteen}} \\ \hline \end{array}$$

$$\begin{array}{r} 28) \quad 3f99_{\text{sixteen}} \\ + \quad 76c6_{\text{sixteen}} \\ \hline \end{array}$$

$$\begin{array}{r} 29) \quad 2457_{\text{sixteen}} \\ + \quad 6678_{\text{sixteen}} \\ \hline \end{array}$$

30) License plates often have both letters and numerals like the pictures above. By using both letters and numerals, the states are able to use fewer figures to create more unique combinations for their license plates. If a state used only Hindu-Arabic numerals, how many unique license plates could be produced from six figures? ___ How many unique license plates can be produced using three letters followed by three numerals like the example at the top left? ___ How many unique license plates can be produced using three numerals followed by three letters like the example at the top right? ___ How many unique license plates can be produced using six letters? ___ How many unique license plates can be produced using any combination of six letters and/or numerals? ___

Describe the solution in set notation.

31) $\{x \mid x \geq 12\} \cap \{x \mid x \leq 15\}$ 32) $\{x \mid x > 50\} \cup \{x \mid x > 20\}$

Fill in the missing information.

U = the set of all natural numbers.

$$\begin{aligned} A \cap B &= \\ A \cup B &= \\ (A \cup B)' &= \end{aligned}$$
